

## Welcome to the transACT newsletter!

### Breaking news: AWS & transACT sign a Strategic Collaboration Agreement (SCA)

transACT have signed a multi-year, strategic collaboration agreement with AWS, joining a small exclusive group of partners worldwide to hold an SCA. This far-reaching agreement builds upon our longstanding partnership and extensive AWS accreditations, and we are excited to work strategically with AWS to deliver on-going success to our customers.

Gavin Kilpatrick, Director at transACT Technology Solutions stated:

“ This agreement solidifies our joint commitment to delivering exceptional value and service to our customers, empowering them to thrive in the cloud era. We are excited to leverage our cloud migration and optimisation expertise in conjunction with AWS' cutting-edge technologies to drive transformational outcomes for businesses of all sizes. ”

It's been an exceptional first half of the year with our partners and, most importantly, our customers.

We have completed a range of high-profile projects, including Ted Baker's new London Headquarters, delivering all our core services in Audio Visual, IT infrastructure and Cloud.

We also delivered an audio-visual collaboration project for customer OCS in their new Dublin flagship building - see the case study below! We also helped property company Landmark with an audio-visual solution in their latest flagship estate within the prestigious Lighthouse building in Kings Cross, London.

## Expansion into the USA

As part of the continued expansion of the business transACT have launched our new office in Virginia, USA, headed up by our Director of Cloud, Gordon Scobie to service our US customer base and customers with a US presence.
